GERMANY Plant #1

NSW Plant

## The Customer Services

ARDEX offers a wide range of customer services designed to ensure that a construction project proceeds on time with the required performance standards being met.

### ENGINEERS

Specialists in their field can assist engineers select the most effective product system that will be compatible with the building design.

### SPECIFIERS

ARDEX can assist in system selection and project, specification preparation, to ensure the products installed meet the owners requirements, especially service life.

### BUILDERS

The ARDEX Projects Team ensures products are delivered on time and provide support to efficiently resolve any on-site questions.

### INSTALLERS

The ARDEX Technical Services Team assists in ensuring installers questions are answered rapidly and the installation is carried out professionally and in accordance with the specification and good industry practice.

## The Reliability

### RESEARCH AND DEVELOPMENT

All ARDEX products are formulated in Research and Development facilities in several countries including Australia.

### PRODUCTS FOR LOCAL CONDITIONS

Products are formulated specifically to suit local conditions and products formulated overseas are adapted to local conditions in the extensive R&D facilities in Australia.

### PRODUCTION

Specialist manufacturing equipment in each Australian production plant produce the high performance products developed by the ARDEX R&D teams.

### ON-TIME SUPPLY

Flexible manufacturing schedules and decentralised manufacturing ensures that customers are supplied on time with the freshest product possible.

All ARDEX manufacturing and research and development is carried out to ISO 9000 standards.

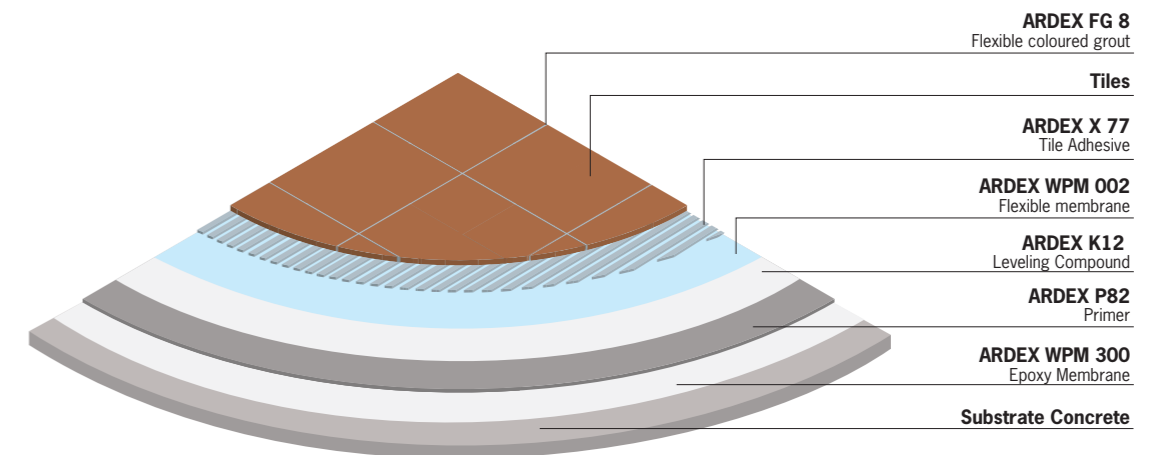

## For the Total Solution

As a result of the extensive range and scope of products, ARDEX provides architects and builders with a SystemARDEX approach that includes all layers of any installation system from the substrate surface through to the finished surface. This approach allows for selection of an integrated solution from the one supplier and avoids all conflicts should potential problems occur.

- Single manufacturer system supply
- Guaranteed system compatibility
- Guarantee of suitability for purpose
- Optimum cost effective system
- Full technical support
- And superior after sales support.
